

## **PUBLIC CONSULTATION ON UBIQUITOUS MALAYSIA AND THE INTERNET OF THINGS**

The Malaysian Communications and Multimedia Commission (SKMM) is pleased to open for public consultation on the Ubiquitous Malaysia & the Internet of Things or UMIT Plan, the aim of which is to engage the public to provide feedback on the issues and challenges facing the ICT industry in the years ahead leading up to Vision 2020.

As more and more broadband infrastructure is entering into a new era whereby ICT planners worldwide are moving towards the Internet of Things with innovative ICT solutions and M2M intelligent services, much still needs to be conceptualized from the drawing board or are at a pilot project stage. This is especially so where convergence have led towards greater usages of wireless sensor technologies and solutions to operate under a ubiquitous lifestyle environment which technically knows no man-made industry segmentation, or government bureaucracy. SKMM believe in the need to show case new Malaysian Ubiquitous ICT services to bring forth greater and cheaper choices which would mean that government has to push through for a structured cohesive Ubiquitous ecosystem.

By reasons of the matters aforesaid we seek your opinion on the above, particularly on the 22 questions under the oval boxes in RED in the UMIT Plan consultation white paper and return your comments by email to [UMIT@cmc.gov.my](mailto:UMIT@cmc.gov.my) or contact (03) 8688 8277/8405 or else to send your written comments in hard copy to Khairunnisa Haswani Zainal Abidin at MCMC, by end of 10 October, 2010 latest.
